Assignment 5B

Chris Dimaio(00754286)
Jishnu Menon(01667740)
Ting li(01741134)
Vivek Kumar(01600980)

*What does this chatbot do?
It can send you weathers forecasts. It asks you where you are.

* How does it open a conversation?
It send you a greeting and send a zoomorphic visual representation of itself.

* How different do you feel than face-to-face conversation?
It feels robotic and the speed of reply are unnatural and the responses feel generic.

* Does it elicit an emotional response from you? If so, what kind?
It annoys you after a while or at least bores you.

* What kind of personality does it have?
It has the personality of a creepy robot.

* How is this expressed?
Generic responses and odd questions.

* What kinds of behavior does it exhibit?
It is not patronizing but a little pushy.

* Is the level of discourse patronizing or at the right level?
It helpful to find weather but nothing else.

* Is the chatbot helpful in helping the user finding out weather info?
It helpful to find weather but nothing else.

* Is it too pushy? Any other negative characteristics?
It's pushy and creepy.

* What gender is it? Do you think this makes a difference?
We do not trust the chat bot.

* Would you trust the chatbot to the extent that you would be happy to follow its guidance? If not, why not?
We do not trust the chat bot. It is not from a trusted Entity and looks very amature.

* What else would it take to make the chatbot persuasive so you will continue to use it?

Do more than tell weather, make it less pushy, and remove the creepy aspect.
